Brightleaf Solutions Announces Alliance with microMEDIA Imaging Systems, Inc. to offer document scanning services

Combined offering will deliver progressive solutions to the legal industry

Brookline, MA – Brightleaf Solutions, Inc., a company that provides software and services to overcome the challenge of mining important information from structured, unstructured and text-based documents today announced their alliance with microMEDIA Imaging Systems, Inc., a market leader in document scanning services. With this partnership, Brightleaf will offer their clients a method to digitize their paper contracts, so that Brightleaf can use the semantic intelligence software to extract meta-data, terms and conditions and even obligations from these contracts. Ultimately, the digitized documents and the extracted meta data gets imported into a Contract Lifecycle Management (CLM) system, where all the reporting and triggers are set.

“With this partnership, we can offer a complete solution to migrate all the paper contracts into a CLM. We are excited to offer this solution to our clients who are dreading the thought of scanning each of their contracts into a computer based file”, said Samir Bhatia, Brightleaf’s CEO. “This otherwise arduous task is done professionally by microMEDIA, who can scan the documents with high speed scanners using ‘best practices’ to ensure quality computer image files”.

“We are known for our quality of our scanning and deliver highly clear results of the images, so that the OCR process can yield accurate results. We respect the sensitivity and confidentiality of the documents that we deal with, and go on site to the client’s premises and perform the scans.” said Joseph Wise, President and CEO of microMEDIA Imaging Systems, Inc. “We are pleased to team up with Brightleaf, who is highly respected in the quality of the extraction of meta-data from documents and contracts”.

ABOUT MICROMEDIA IMAGING SYSTEMS, INC.

Document Scanning Services and document imaging services from microMEDIA are unmatched in the industry. They include digitizing paper files, drawings, conversion of microfilm, microfiche and aperture cards. We also migrate legacy imaging systems. Our customized conversions meet customer goals through scanning, manual data entry and electronic image capture.

Most projects include Optical Character Recognition (OCR) and output in Adobe PDF format, but microMEDIA can create deliverables in any file format requested. For more information, visit www.imagingservices.com.

ABOUT BRIGHTLEAF SOLUTIONS, INC.

Brightleaf provides a technology powered service to extract information from your contracts using our own proprietary semantic intelligence/natural language processing technology, our own team of lawyers to check the output, and our own Six-Sigma process to deliver end-to-end, highly accurate, extracted data from your contracts.

The data can be virtually anything, and it is customized for each of your type of contracts. All meta-data, terms and conditions, legal provisions, and even all obligations (which are usually scattered throughout your contracts) are extracted by our software. This extracted data is checked by our team of lawyers, and provided in a format for easy upload into any system, such as a Contract Lifecycle Management System (CLM), for tracking and reporting ([download Strategy Brief](#)).

This allows you to leverage the knowledge in your existing contracts, report on the extracted data, even recover hidden revenue (e.g. by policing penalty clauses in your supplier agreements) and comply with current and upcoming regulations.

Brightleaf was voted one of the top five data mining companies, and the only one in the legal space.
