Brightleaf Solutions Upcoming Live Webinar: Preparing for a Successful CLM Deployment

A live online event to discuss different phases for the implementation of a CLM system

Brookline, MA – Brightleaf Solutions, Inc. is hosting a joint webinar with CLM Gurus to highlight the challenges faced and phases to successfully implement a Contract Lifecycle Management (CLM) system.

Organizations, whether they are small or large, manufacturing or technology, product-based or service-based, doing business with their suppliers or customers, need to put their commitments in writing to avoid any confusion or oversights. This presents the need for a contract, a written, legally binding document to render services or provide a product against a price, making these the most critical documents to manage within an organization. Once the contract is executed and the project is handed over to operations, people (including sales personnel) tend to concentrate on other projects, leaving the contract unattended. Organizations then start losing track of what is in their contracts. Here comes the need to put an efficient CLM system in place, join Brightleaf and CLM Gurus to uncover different phases to the successful implementation of a CLM system.

Brightleaf Solutions, a contract migration, and data extraction service provider is hosting a joint webinar with an implementation partner CLM Gurus to discuss the different phases for the implementation of a CLM system on May 26th, 2021 at 1:00 PM EST.

The webinar will cover the different phases starting from defining the use cases for your company to migrating the required data into a CLM system.

The webinar takes place on Wednesday May 26, 2021, at 1:00 PM EST is free for all. Registration and instructions are available on the Brightleaf website: https://www.brightleaf.com/webinar_preparing_for_a_successful-clm-deployment/

ABOUT BRIGHTLEAF SOLUTIONS, INC.

Brightleaf provides a technology powered service to extract data from your contracts at extreme accuracy using our own proprietary AI/Semantic Intelligence/Natural Language Processing technology, our own team of lawyers to check the output, and our own Six-Sigma process.

Your legacy contractual documents along with this extracted meta-data can be migrated into a Contract Lifecycle Management (CLM) system for tracking and reporting. This greatly enhances the value of your investment in the system. The data can be virtually anything, and it is customized for each of your type of contracts. All meta-data, terms and conditions, legal provisions, and even all obligations (which are usually scattered throughout your contracts) are extracted by our software. Our team of lawyers check each-and-

every extracted data-point against the original documents using a stringent Six-Sigma quality process, which delivers highly accurate results.

Brightleaf gets recognized very often, including “Company of the Year” as a Contract Management Services provider. Details of this and other recognitions and awards can be found at www.brightleaf.com/awards-recognitions
